### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S.

2,718,684 to **Bjorksten** in view of U.S. 4,668,319 to **Piccoli**.

The patent to **Bjorksten** discloses a pipelaying method and apparatus including a transportation device (2), a pipe forming device including a die (6) that receives extruded material from at least one extrusion material supply device (4). Pipe (7) of thermoplastic synthetic resin is continually extruded from the die as the device moves along the trench. The digging of the trench may be accomplished by a plow member or trench digger mounted on the extruder device. **Bjorksten** does not disclose two dies nor does it disclose a reinforcing textile supply and guide. The patent to **Piccoli** discloses a method of manufacturing a reinforced hose including a first die (52) for extruding the inner hose (51), followed by a reinforcing braider (53) to add the reinforcing layer, and a second extruding die (54) which provides the outer cover layer. **Piccoli** discloses that it is known to provide two dies and a wire braider in order

to produce a pipe having an inner layer, a braided layer and a cover layer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide to the apparatus of **Bjorksten** a second die and a reinforcing textile supply as suggested by **Piccoli** in order to form a strong, but flexible multilayer hose.

### *Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Idoine, Coulter et al., Kasiewicz, and Corre et al. are all pertinent to Applicant's invention in disclosing devices for both making and laying pipelines in trenches dug by the device also.
